

THERAKids Foundation – Child Development Centre is a leading multidisciplinary organization dedicated to providing high-quality therapy services for children facing **developmental, sensory, cognitive, and physical challenges**. We are committed to creating an environment where every child receives specialized care tailored to their unique needs, enabling them to achieve their fullest potential. With a strong emphasis on early **intervention and a structured therapeutic approach**, we work closely with children and their families to enhance their abilities, promote independence, and improve their overall quality of life. Our foundation is built on the belief that every child has the potential to grow, learn, and thrive when provided with the right support system and guidance.

Our **mission** has always been to equip children with the necessary skills to develop independence, confidence, and convenience in their daily lives. We aim to create a nurturing environment where children feel safe, motivated, and encouraged to overcome their challenges. Our team consists of experienced and **certified professionals, including psychologists, occupational therapists, physiotherapists, special educators, and speech therapists**, who work together to design individualized intervention plans that focus on the child's strengths and areas of improvement. At THERAKids, we believe that therapy is not just about intervention but about empowering children and their families to navigate daily life with greater ease and success.

THERAKids provides a comprehensive range of **therapy services**, including **speech therapy, occupational therapy, special education therapy, physiotherapy, ABA therapy, psychological assessments and reviews, parent counseling, group therapy, tele-rehabilitation and consultation, and structured parent training programs**. We also offer structured programs such as **preschool group training and social skills development**, which help children prepare for academic and social settings. Our therapies are designed to cater to children with **Autism Spectrum Disorder (ASD), ADHD, developmental delays, learning disabilities, and other cognitive and physical challenges**. By using evidence-based methodologies and continuously upgrading our approaches, we ensure that every child receives the best possible care that aligns with their developmental needs.

Over the years, we have conducted thousands of therapy sessions, helping hundreds of children make remarkable progress. Many of our children have successfully transitioned into mainstream schools, developed essential life skills, and improved their communication and motor abilities significantly. We take immense pride in witnessing the transformation of our young learners as they grow in confidence, capability, and independence. The success stories of our children are a testament to the dedication, expertise, and relentless efforts of our team, who work tirelessly to ensure that every therapy session brings positive change.

THERAKids is not just a therapy center; it is a place where children find **hope**, where parents find guidance, and where every small milestone is celebrated as a big achievement. We take pride in being a trusted name in pediatric therapy, continuously striving to improve our services and provide the highest standard of care to every child who walks through our doors.
